---

Shawn,

We provided notification of the change to an AR-certified laboratory in the July 2010 monthly report. We changed from Continental Analytical Services to Arkansas Analytical, Inc. at the suggestion of the ADEQ. Arkansas Analytical, Inc. is a state-certified laboratory.

I have requested a Statement of Qualifications from our consultant, Oxford, Inc. I will be on vacation next week but will forward this to you upon my return.

Also, the next sampling of New Cricket Creek is scheduled for next Tuesday, April 19. If you would like to have someone from the state or USGS collect a duplicate sample at that time, please contact Jim Fleur of Oxford to coordinate those arrangements. Jim can be reached at (913) 706-3422.

Jean
